

The Diversity of Denim

Written by Arizona Foothills Magazine

Denim has been a staple piece in our wardrobe for quite sometime, but this spring, denim is trending in a whole new way. This spring you can find denim being paired with anything from floral patterns, to denim on denim.

When we say "Denim" it is no longer just a great pair of classic jeans, for spring 2014 it means button down shirts, tanks, dresses, and pants in endless washes and colors.

From acid wash to various textures, denim can be dressy or casual. Denim is a trend that keeps reappearing in various forms, and this spring it is making a strong comeback with its Blue hue's to be paired with colors like cream, and powder pink for an extra feminine look.
