

Inspectress Gadget: The LG Quantum- Not For Slow People

Written by Claire Perkins

If there's one thing I can't deal with, it's slow people. People who you have to explain everything to, people who ask you to send them an address they could have easily Googled themselves, people who can't do a Facebook search. I don't like being asked questions. Figure it out yourself! </rant>

Unfortunately, the world is full of these people. Free as a bird, happy-go-lucky...slow. Is there a gadget that can help uptight gals like yours truly?

Leave me alone with my phone.

What type of girl would use this phone? Girls like me, who lack patience and don't like to be bothered.

Read on for the deets!

...But It's What's Inside That Counts

Another AT&T Windows Phone 7, the LG Quantum's OS is the definition of efficient. No messing around, boring buttons or other nonsense that slows you down. As we mentioned last week, Windows Phone 7 keeps everything at the surface with a "hub and tile interface" We love it! What's more, the AT&T Windows 7 Phones are already known for their fast processors. We have a feeling we're going to get a lot done with this bad boy.

Features include:

- **3G High-Speed Data & Voice**
- **Multitasking-** use voice and data at the same time
- **Full Web browsing** on an HTML browser- it's just like a PC!

Least Favorite Feature: I'd like the option for expandable memory- it doesn't currently have that option, and I have a lot of iTunes I'd like to have in tow.

The LG Quantum is available now at ATT.com or AT&T stores for \$199 with a two-year contract.
