It's nowhere to be found on the menu, but AJ's is serving up a glorious cup of iced coffee...

Next time you're at an AJ's, ask the barista for a cup of iced coffee from concentrate- sounds scary, but it's amazing. Coffee from concentrate is brewed with cold water into a deep, delicious syrup, so you get all the delightful flavor with none of the bitterness of regular iced coffee.

There's no signage about it in the boulangerie and it's not on the menu: we just heard another person order it and were pleasantly surprised by our new find.

Try it out and let us know what you think!
