---

You're traveling this summer- now your pet can, too. Alone.

Don't worry, they won't be stuck in a cage somewhere in cargo. [PetAirways](#) is a new luxury airline service for pets only! Pets fly in the main cabin, and are accompanied by trained pet attendants. The temperatures are always comfortable, they handle the pets when there are delays or cancellations, and all pet transportation and carriers are complimentary. You can even track Fido's entire journey online.

Here are the steps:

- Book your flight online, at [PetAirways](#)
- On the day of flight, check your pet in at the Pet Lounge in the airport
- Your pet will be walked no more than 2 hours prior to their flight
- Pet attendants board the flight with your animal
- Pet attendants monitor your animals for the entire duration of the flight, walking them immediately upon arrival
- Pets are taken to the Pet Lounge for pickup (send him to your parents), or to a PAWS Lodge Pet Resort for the evening

Where would you send your dog?
