We can't think of a better way to ride into spring than in a new Mercedes-Benz! Phoenix Motor Company has the latest E-Class models that are sure to keep you feeling luxurious all year round. The E350 and E550 feature some of the latest and greatest technology paired up with classic quintessential feeling that is Mercedes-Benz.

For about 60 years, the Mercedes-Benz E-Class has upheld a luxurious demeanor, and the new 2011 models definitely do not fail to deliver. Exteriously, E-Class models' hoods appear to be finely chiseled, creating a bold look. The LED headlights ensure that the cars remain fierce and noticed, too. Of course, the classic grille remains a striking feature as the highlight of the car. The bodies of these streamlined cars effortlessly combine contemporary and classic.

With the new E-Class, there's more than meets the eye. A quick glance inside and you'll see the rich hand-fitted leather upholstery, hand-polished wood and metal trim. The E-Class offers a hodgepodge of optional features, allowing you to take your high-class vehicle from fancy to exceptional. Mercedes-Benz offers drive-dynamic multi-contour driver seats equipped with a massage feature and adjustable side bolsters for maneuvering and safety. Comfort is a priority with front-seat memory systems to remember seating positions.

When it comes to technology, the E-Class steering wheels are a wonder in themselves. They come standard with new paddle shifters and multifunctional audio and information controls for convenience at your fingertips. Climate control is above and beyond luxurious with dual systems engineered with automatic control over airflow distribution and speed, pollen, charcoal, and dust filters, and sun and humidity sensors—pure air for a pure car. The dash holds a six-disc CD and DVD changer that can transform E-Class models into a personal entertainment system with the digital sound of harman/kardon LOGIC7 technology as well as HD Radio or SIRIUS Satellite Radio.

The future of today's technology is seamlessly incorporated with the COMAND system, allowing drivers to vocally control navigation, audio, hands-free calling, video and more, all without having to lift a finger.

Other drivers are taken into account when you're on the road in an E-Class model with Adaptive Highbeam Assist which uses a camera to detect the range of your high beams to automatically adjust. The prototype system ATTENTION ASSIST is also featured to help you stay awake and alert and ensure safe driving. Blind spot and lane-keeping assistance may also be added to an E-Class model.

There's no limit to what a Mercedes-Benz E-Class can do. With many packages and innovative technology like PARKTRONIC to help you park with ease, you'll be left satisfied for years to come.
