This time of year is all about gifting, may it be your special someone or a splurge for yourself. With an economy that is not so striking-hot and consumers keeping their wallets tight, words like “elaborate” and “flamboyant” do not come to mind when thinking about one’s wardrobe. This holiday season, I strongly encourage buying tantalizing items. Something that will make your heart race with excitement. Instead of buying a few articles of smart clothing, put it towards a spontaneous statement-making item. The uniqueness of the item will give you more bang for your buck and give them something to talk about at the office. Below are some of my favorites this holiday season to inspire you. (Look for my season must-haves for men, home and beauty in the following weeks.)
