The Spring/Summer collection of Costello Tagliapietra was a stunning line and certainly one of the best during New York Fashion Week. Few understand the modern, ultra-feminine woman like the boys of Costello Tagliapietra. Shades of nude, stone, slate and psychedelic-camo were shown. The colors and print took second-row to the divine cut and draping of the garments; perfectly placed pleats, gathered details and modern methods to sleeves and pockets. The collection explores and redefines the rules of 'classic' and offers pieces with longevity in trend.

A few articles from the collection can now be [purchased online at Barneys.com](#). For those on the go, who demand an effortless look; this collection is for you. No closet should be without an item or two from Costello Tagliapietra.
