Start Fresh Executive Recovery is providing a new way to treat alcohol recovery for people in Arizona, under an exclusive distribution licensing arrangement with Fresh Start Private Management Inc..

The Start Fresh Executive Recovery program offers a comprehensive alcohol recovery program with medical treatment and counseling. Treatment starts with **the innovative Naltrexone Implant procedure which has been shown to** significantly reduce physical cravings for alcohol over an extended period of time. This is followed by a *Life Coaching Program*, and a *Family & Friends Rebuilding Program* offered by Start Fresh.

Kent Emry, CEO of Fresh Start Private Management, Inc., said, "We are very excited that the treatment program is now available with the opening of a clinic in Arizona. There are about 7 million people in Arizona and many families need help there. With their marketing and healthcare experience, we feel that Start Fresh Alcohol Recovery Southwest will bring our revolutionary program to market quickly and professionally."

Recently Start Fresh was in the news when Jeremy Miller, star of the hit 1980's television show *Growing Pains*, was a guest on *Loveline*, with Dr. Drew and Mike. Jeremy is a graduate of the treatment program and was on the show talking about his relationships and history of addiction. Visit online at <http://tinyurl.com/m2ubwv4> to listen to Jeremy's interview.
