EXTRA EXTRA!

Shea Homes recently launched its newest design and home building tactic, "Shea3D". This new way of building homes will give homebuyers an opportunity to choose from different 'interchangeable lifestyle-driven spaces'. Whether your dream place to live is outdoorsy, kitchen or entertainment style based, Shea Homes has the right spot for you. Homebuyers can choose their custom space in the East Valley from Shea Home's newest Gilbert Community, Marbella Vineyards. This new area has 12 lots and nine designer inventory homes available for first sales; and not to worry, there will be plenty more to come!

"Shea3D gives homebuyers a feeling of individuality," said Ken Peterson, Vice President of Sales and Marketing for Shea Homes Arizona, in a press release. With so many combination plans for your home, the chances of seeing a home identical to your own on the same street are very little. This new product is definitely a game-changer for the homebuilding industry. Shea3D offers personalized homes that fit the specific needs of each family and individual. What more can you ask for when buying a home for yourself and the people you love?
