After a three-month renovation, Scottsdale Resort has unveiled its new-and-improved Amansala Spa. The combined spa, salon and fitness center space now spans 4,000 square feet. The exercise area comprises new cardio equipment (double the amount of equipment as before the renovation) and all-new circuit machinery, free weights and accompaniments. For a little post-workout pampering, there are now five treatment rooms with separate entrances for privacy, including a skin care room, three massage rooms and a wet room. (Nail services are also available.) Scottsdale Resort added a comfy relaxation room to the spa. To offer that extra something special to its guests, Amansala Spa also provides complimentary infused water blends from [Pure Inventions](#) at check in and in the relaxation room. www.thescottsdaleresort.com.
