We find inspiration from all different things: architecture, nature, fashion, etc. Instead of copying what others are designing for their wedding, we pull ideas from our surroundings or things that we see from other industries. In the past, we would have cut ideas from fashion or interior design magazines. Now, we use [Pinterest](#) to find and keep things that inspire us organized. If you haven't joined the Pinterest phenomenon yet, you need to begin today. You will likely be addicted to pinning photos of things that inspire you within days. Rachel and I loved it immediately and now pin items every day. It is a brilliant tool to easily keep all of your wedding ideas in one place. Below I have shared some things that have inspired us. We both also have a plethora of floral, stationery, tablescape, lighting and favor boards too!
