EXTRA EXTRA!

Besides offering a wide variety of lodging accommodations, including nightly cabin rentals, cottages rentals, town-home rentals, and more, the Greer Lodge Resort & Cabins is expanding starting this season!

Their immediate plans are to create a giant winter park with a bunny hill for children eight and younger. They will be eligible to learn to snow ski and snowboard. Going over the river, there will be built a great sledding hill for all ages. With this 25' wide run, snow tubes, snow sleds, and infant toboggans, this will provide a safe but exciting downhill ride for everyone to enjoy along with a gazebo by Christmas.

In the Springtime, topsoil and a sprinkler system will be brought with Kentucky Blue Grass for a summer park.

As for the future, The Greer Lodge Resort has plans to build out 8 more cozy cabins in other areas of the resort.

The resort is making other improvements for they converted their barn in the parking lot of the Main Lodge to a Guest Services building. Guests will go to pick up snow tubes, snow sleds, bikes for the family and friends, fly fishing gear, telescopes, and more. The best part is that these fine items are all complimentary.

The Greer Lodge Resort & Cabins are thriving in this down economy because it has economical prices and all their amenities are complimentary.
