Don't you wish you could pack comfy little shoes in your little clutch when you go out? Now you can!

Rollasole is already a huge hit overseas, and is on it's way to the US in 2010!

The little metallic (and black) flats are sold in special vending machines in the UK at nightclubs and hotspots. Girls in painful stilettos pick them up for about \$8 per pair, and stroll home in comfort and style.

Until they make their debut in the US, we can order via Rollasole.com- they ship internationally!
