Built at the same factory as the Porsche Boxster and Cayman and with luxury features such as a super-car inspired steering wheel, a built-in refrigerator and hand-stitched seats, The Garia Golf Car is the ultimate machine in its class!

With the street legal version of The Garia you can take luxury and comfort straight from the green to the street. Now, The Garia LSV lets you drive directly from the golf course to the streets. Fitted with street legal safety equipment such as seatbelts, side mirrors and reflectors, The Garia LSV will take you straight from your home to the golf course, tennis club, grocery store or your favorite café.

With a 25 mph top speed, The Garia LSV features a double wishbone front suspension, automotive style shocks and springs and a unique digital instrument cluster with all relevant driver information. It has superlative handling and stability, extra storage space and a comfortable car-like driving position simply makes The Garia LSV ideal for your short, daily commutes.

The Garia LSV features a drive train built by an Italian company that also produces Ducati gearboxes, and its components are made by the same company that supplies Aston Martin, Jaguar, and Volvo.

With automotive features unseen in the golf cart industry The Garia LSV has – as the first golf cart ever - entered the automotive league and earned its right to be called a car as opposed to a cart.
