Renowned doctor, Mitchell Kaye, M.D., is bringing relief to patients across the Valley and the nation at Scottsdale's [Natural Restoration Centers of America](#) via cutting-edge stem cell treatments. The treatments harness the body's natural ability to heal, restore and rejuvenate itself, and can be used to treat, alleviate or even prevent an almost endless list of conditions, from erectile dysfunction to joint pain, Alzheimer's disease to diabetes, and even aging, via the center's Ultimate Stem Cell Facial.

"More and more patients are turning to stem cell treatments to help relieve symptoms, especially when traditional medical treatments have failed," Dr. Kaye explains. "And Natural Restoration Centers of America is providing an outlet for applying these cutting-edge alternative therapies to help fill a void, both as an effort to help patients avoid the need for surgical intervention or to alleviate or even prevent conditions."

Dr. Kaye has been practicing in the Valley for more than 20 years, and has been a board-certified physician for 30 years. He began his medical career at the prestigious Georgetown University School of Medicine, and received his specialty training at the Cleveland Clinic Foundation. After a stint in the military, he settled in Scottsdale and became a top urologic doctor. Currently a leading Urologist at Honor Health system, he pioneered robotic surgery more than 17 years ago, and in a quest to continually provide the most cutting-edge, noninvasive therapies for his patients.

"My first involvement with regenerative medicine began approximately ten years ago when I was studying methods to try to improve outcomes of certain surgical procedures that I would perform as a urologist. I began to use certain biologic materials to try to minimize things such as scarring, which could have a negative impact on a patient's recovery," he explains.

From there, Dr. Kaye began to apply these methodologies to very common urologic problems that were known to have a major impact on quality of life, such as erectile dysfunction or poor vaginal health. The successes drew the attention of other doctors and types of cases, and as research progressed, the treatments offered expanded to include a range of conditions.

"Restoration Centers of America has been approached for conditions such as Lyme's disease; autism, early diabetes, bowel diseases such as Crohn's and ulcerative colitis, chronic pain such as back and joints, peripheral neuropathy, including restless leg syndrome, chronic neurologic diseases such as Parkinson's, stroke, heart attack, erectile dysfunction and vaginal atrophy, dermatologic conditions, Alzheimer's disease. Lastly, we help treat progressively thinking patients who like to take care of their own health care and look to these therapies as a way to optimize their health, improve their longevity, and are interested in mitigating chronic conditions that could negatively impact them as they waltz through their golden years," says Kaye.

"As we know, with aging, our bodies deteriorate on many different levels. Stem cell-based therapies can potentially restore, replace or regenerate ailing tissues within the body."

Natural Restoration Centers of America is located at 10210 N. 92nd St., Ste. 100, Scottsdale, AZ 85258. Contact 480.990.8544 or visit nrcoa.com for more information.

The Ultimate Stem Cell Facial is micro needling, platelet rich plasma, with system infusion of stem cells. Call now for the holiday special: \$500 off.
