## You Greet the World With Your Smile:

If you have discolored, uneven, or cracked teeth it may be difficult to do so confidently. The good news is, cosmetic dentistry can help.

## Veneers Are A Dependable, Affordable Solution To Imperfect Smiles:

Veneers are thin, tooth-colored porcelain shells that cover your natural teeth. Long lasting and natural looking, they can **protect your teeth from further damage and give you the beautiful smile you desire.**

## Most Cosmetic Dental Issues Can Be Solved With Veneers:

Using veneers, we can help you change the color, shape, length, alignment, and spacing of your teeth. Veneers can help with any of the following issues:

- Worn down, chipped, or broken teeth
- Stained or discolored teeth
- Uneven or irregularly shaped teeth
- Gaps between teeth

Whether you're hoping to fill in a gap, lengthening a worn down tooth, or covering cracks or chips, veneers can give you a fuller, more symmetric smile—one that you can show the world with confidence.

## Our Patients Have Had Great Success With Veneers:

There have been smile makeovers the **results were amazing.** They have taken men and women who never smile in public to people who want to show off their smile all day.

## Veneers May Be The Quickest, Easiest Way To Enhance Your Smile:

Often, in just **two to three visits**, you can have a brand new, gorgeous smile. So, the only question is, what are you waiting for? **Call the office of Ginger Price DDS** today and together they'll determine if veneers are the best solution for you.

If you're ready to learn more about this exciting option for veneers, contact the office of Dr. Ginger Price at 602-468-1135 to discuss your options. Content Provided by: [Ginger Price DDS](#)
