You've clocked in hours at the gym, eat a balanced diet and maintain a healthy lifestyle, but still aren't quite seeing the physical results you desire. Leave it to the professionals at Luxe Medical Artistry to sculpt the body you've always dreamed of into a reality.

Introducing LipoSculpture, an innovative lipo procedure by Luxe Medical Artistry that promises a pleasant experience and fast results without the medical risk, discomfort and downtime that traditional liposuction typically involves.

The beauty of LipoSculpture lies within the medical artistry of sculpting. The Scottsdale-based Luxe Medical Artistry utilizes a patented harmonic vibration, whereby a 2-millimeter entry point is made into the skin that's smaller than a pencil eraser to immediately transfer fat from unwanted areas and sculpt the beautiful natural Breast Augmentation or curvaceous Brazilian Butt Lift you've always desired.

The minimally invasive LipoSculpture procedure allows you to have the peace of mind of being awake the entire time. Whether you choose to watch your stubborn fat disappear right before your eyes or tune out listening to music or watching a movie instead, Luxe Medical Artistry uses only local anesthesia to relax and calm any nerves you might have instead of general anesthesia that can potentially have serious medical risks.

Instead of the telltale lines or suture marks of traditional surgery, no scalpel and no stitches are used, meaning either no marks are left behind or, at the very most, only a faint mark similar to a freckle. The skin heals on its own so that minimal swelling can drain quickly, allowing the body to heal naturally.

While standard liposuction can take up to 6 months of recovery, LipoSculpture patients resume normal activities within 48 hours after the procedure while seeing immediate results! You'll also enjoy continued benefits, such as skin tightening and further fat loss, up to 6 months post-op.

Whether you're a man looking to tone up "love handles" around the abdomen or a woman wishing to melt away "bra fat" in favor of a perkier behind, a free 45-minute consultation awaits at Luxe Medical Artistry by clicking [here](#) or calling (480) 500-5406.
